

# THE GLEICHEN CALL

VOLUME XXXVIII NO. 34

GLEICHEN, ALBERTA, WEDNESDAY NOVEMBER 7, 1945

SUBSCRIPTION \$2.00 PER YEAR

## Memorial Hall For The Legion Planned By Citizens

A meeting of the citizens of Gleichhen and district was held in the Community hall on Friday, October 26th, to discuss plans for some form of a memorial that would express their appreciation and gratitude to those of our young men and women who enlisted and served in World War II, in order that the democratic people of the world might continue to enjoy those forms of freedom for which our forefathers fought and died.

It was unanimously agreed that the best way of having the Gleichhen branch of the Legion in repairing, adding addition to and furnishing the Oddfellows building, has been donated by the town to the Legion so that when the boys come back they will have a home in which to meet and discuss their problems.

During the war we heard a great deal of the new order that was to result from the war and that it was a reward of our heroes when they returned. The war has been won but the new order that would win peace is as much a myth as ever.

If our returned men leave their future in the hands of politicians the results will be similar to those following the last war—they could not be worse. Our returned men will get only what they fight for and the new order will depend on the strength of their organization of which this Gleichhen unit forms a part. They won't be war for us. We failed them in the past. We did not win the peace and now it is up to all of us to get behind them and help clear up the job at home.

On Wednesday, October 31, a committee of four met to consider the problem of the Legion offering their co-operation in aiding in the financing of the new hall. It was estimated that the cost of the repairs, addition and furnishings would be about \$10,000 and it was decided to make a canvas of the district for this sum.

A public meeting has been arranged to be held in the Gleichhen Community Hall on Monday, November 19th, when the committee will make its report and plans for the building will be shown and explained and arrangements made for a drive for funds.

While this may seem a large sum to ask for it is a mere trifle when we consider that because of the war we were willing to fight and risk their lives for us who manned the home front have enjoyed a greater period of prosperity than we ever had before, and because they won the war we will be able to keep what we have. So when the canvassers call on us for contributions let us be generous. They did not let us down over there—we can't let them down when they come home.

At a public meeting on Monday, November 19th, the guest speaker will be Capt. H. Prowse M.L.A. for the Armed Forces or P.L. Conn. P.C. Colborne, M.L.A. for the Air Force.

Keep November 19th an open date and show the boys you appreciate what they have done by attending this meeting.

The C.P.R. has always had an eye to the future. Research on company equipment has aimed towards providing the utmost in travel comfort. Right now, for instance, the Canadian Pacific has ready on its drawing boards many innovations for passenger coaches, freight cars and motive power some already "test-run" in cars rebuilt and engines delivered during the war.

They are to be built when materials

shortages are a thing of the past. So it will be that peace-time travellers will find excellent sleeping accommodation with folding beds under windows, indirect lighting, new decor for interiors and exteriors which carry out the modern trend.

Going back to that "Last Spike" ceremony at Craigellachie in the Canadian Rockies, it brought to life a dream cherished by Canada's builders, among them Sir John A. Macdonald, who foresaw that the striding bonds of Confederation could not hold without some empire-building agency such as the C.P.R. proved to be.

In the intervening 60 years, packed with history as they have been, tracks have lengthened from the 4-385 miles which made up the first "main line" to more than 20,000.

Ships carrying the red and white Canadian Pacific house flag have touched every ocean port round the world, and have served the Great Lakes, Bay of Fundy and British Columbia waters. A chain of eight hotels, including the Empire—largest, the Royal York in Toronto, provide the utmost in service in cities from coast to coast, supplemented by beautiful summer resorts, ranging from the Pines and the Alcyon Hotel in the Maritime to the Elton Springs Hotel and Chateau Lake Louise in the Rockies.

In two world wars the Canadian Pacific has been the backbone of communication lines, and the facilities of its shops, have supported victory's cause. Since 1939 Canadian Pacific steamships' two ocean fleets has been serving the Admiralty with 11 ships victims of enemy attack for the greatest loss of any steamship company, while its air lines made history by pioneering the "Atlantic Ferry" to fly vital needed bombs to England.

The stringing slow which drove home the "Last Spike 60 years ago" began the beginning of a new era in transportation. Canadian Pacific's progress through those dark burning, gas-lit years to its status of today assures its leadership in peace time tomorrow as the world's greatest travel system.

## Victory Loan

The progress in the drive for subscriptions for the Ninth Victory Loan in this area has been slow. Up to yesterday the amount of subscriptions received amounted only to 67 percent of the quota. Owing to the storm Monday and cold weather since the drive has slowed up some what. If we are to reach our quota of \$100,000 by the end of the week the public will have to come forward a good deal faster than they have during the past couple of weeks.

Late here and there, due to nature's frowns, were mere flecks on the picture of rural progress across Canada as the Ninth Victory loan campaign entered its final week.

A number of Alberta units were over the top before the second week had ended and 12 of them were now city units. The outkicks have a shade ahead of the north but both are confident that the overall provincial objective will be attained.

Rural units in British Columbia are reportedly running considerably behind their urban competitors. In most farming communities, canvassing is slower owing to several days of bad weather early in the campaign. Almost all farming communities show slightly fewer applications than at this point in the Eighth Loan, but farmers are beseeching the two-in-one appeal fairly well.

## WEDDING BELLS

A pretty wedding was solemnized at the Anglican Church in Gleichhen Nov. 4th, when Gladys Ireno, daughter of Mr. and Mrs. F. J. Ferguson, became the bride of Joseph Edward Hild, son of Mr. and Mrs. A. Hild. The ceremony was performed by Rev. D. A. Ford. The bride escorted by her father, a gorgeous blue gown trimmed with sequins and carried a bouquet of red roses.

Miss Della Hunter was bridesmaid. She was a gown of sequin trim fuchsia and a bouquet of yellow mums. Mr. Jack Wilson was groomsmen and the guests were ushered by Mr. Edward Ferguson. During the singing of the register wedding music was played by Mr. J. Stenmeyer.

More than forty guests attended the reception held at the bride's home where the bridal party received the guests. Flowers, white and blue streamers with white bells decorated the dining room and tables. The bride's table was decorated with a three-tiered wedding cake. Toasts were prepared and responded to. After the reception all joined

## Tex Cassidy Buys Shoe And Harness Stock Of J. Little

Julius Little has sold his harness and shoe repair stock and building to R. S. McQueen. Mr. McQueen has since sold the stock to Tex Cassidy who will now carry on the business.

Mr. Little came to Gleichhen in April 1905 and for some years worked for T. H. Beach, before moving to the coast where he lived for a time. He returned to Gleichhen over 13 years ago and started in business for himself at Arrowwood later moving to Gleichhen. He made a success of the business and the same day he sold out he sold his farm west of town along with his household effects.

Julius is retiring and will still continue to make his home in Gleichhen, around the piano in a sing song ending with "They Are Jolly Good Fellows" and three cheers.

Mr. and Mrs. Holland left on the evening train for Calgary, Vancouver and other places. For travelling the bride changed to a grey ensemble with black hat and veil and accessories. Upon their return to Gleichhen they will reside on their farm five miles west of town.

## Remembrance Day Service In The Community Hall

On Remembrance Day, Sunday, November 11th, services will be conducted by Rev. D. A. Ford, B.A., in the Community Hall commencing at 10:15 a.m. sharp. Everybody is cordially invited to attend.

ARMISTICE DAY 1945  
On November 11 we are observing Armistice Day . . . the end of World War I. And thus, in a year of victory we are remembering another year of victory.

But we will be remembering November 11, 1918, not with happiness, but with solemnity. Many of us will recall vividly the wild celebrations that took place on that 1918 day . . . the flag waving the shouting, the sound of automobile horns, and the crowds of happy people.

For we thought, in our optimism and our innocence, that we were winning the end of all wars, and that the spectre would never rise again in our time. But it did rise, and we had not the moral conviction, perhaps, or the foresight, to slay it before it could get completely out of

hand. But we have learned, from 1939 to 1945, something new. World War II taught us that the follies of peace are the follies that lead to destruction. In World War I we thought that once the war would be over it would be over.

In World War II we fought with our eyes to the future. Even while the battles were raging we did not lose sight of the fact that once victory was won we would have to knock down and pay for it with vigilance and wisdom.

It is hoped that all are keeping that lesson in mind.

Madam Chiang Kai-shek voiced some thoughts on this very thing in her V-J Day Victory Message. We think they bear repeating at this time.

Here they are:  
"But what of tomorrow? We must do our utmost through practical measures to assist the maimed, the wounded and the displaced. And out of the destruction and desolation of this battle-scarred and broken world around us we must build a future to justify the suffering and loss of life which this war has brought. Out of this soul-shaking experience we must learn that omission to prevent war is just as culpable and disastrous in the end as commission to foster war. In the fighting, only in this way can we even repay in a measure

## Mr. and Mrs. G. House Celebrate Their Golden Wedding

On Friday evening a large number of friends of Mr. and Mrs. G. G. House met in the Arrowwood Hall to honor them on their 50th wedding anniversary. The evening was spent in singing and games. Mr. Robert Hill on behalf of the assembled people with a beautiful dinner set, and at the same time told some humorous stories of Mr. House's experiences in the early days when he first came to the district. In one of the stories Mr. House built his home in the winter time and when spring came he found the house was erected in the middle of the road allowance. After a splendid lunch and just before leaving all wished Mr. and Mrs. House many more years of happy married life.

the debt of life that we owe to those who have died."

These are the thoughts we are thinking as we observe the anniversary of the end of World War I. May we never have a World War III. And this will have to be more than just a pious wish. It will be something we will have to work hard to prevent.

## FARM MACHINERY OFF RATION LIST

All rationing controls have been removed from sales of farm machinery, and restrictions on the production or importation of such machinery have been lifted.

Price controls remain. Generally, maximum prices for farm implements is the price at which such items sold during the basic period, August 15—September 11, 1941.

Quoted prices do not include cost of delivery to the purchaser. Under Consumers' Credit Order No. 225, section 10, terms of sale for farm machinery are: 1/3 of quoted price paid in cash, the balance of the credit price to be paid within two years of the date of the contract in stated amounts at specified dates. Any allowance for a trade-in is to be deducted from the unpaid balance.

Despite the lifting of production restrictions, it is expected that the shortage of components such as malleable castings and sheet steel will limit the maximum output of farm implements during the early July 1, 1945, to June 30, 1946, to a 24% increase (on tonnage basis) over the output in the preceding 12 months.

## Farmers' Poultry Prices

Farmers selling all types of poultry, except turkeys, direct to consumers are permitted a 25% markup over the wholesale selling prices established for the zone in which they are located. Turkey producers are allowed a 20% markup over the wholesale level.

## Potato Storage Allowance

(Order A-1560 now in effect)

A storage allowance of 5c per 75-lb. bag of potatoes and 7c per 100-lb. bag is allowed on November 1. Another 5c per 75-lb. bag and 6c per 100-lb. bag may be added on December 1, and another 5c per 75-lb. bag and 7c per 100-lb. bag on January 1, 1946. There will be no storage adjustment for February but monthly increases will be resumed on March 1.

## FARMERS' RATION COUPONS

Coupons covering farmer sales or farm household consumption of meat and butter, and sales of preserves must be forwarded to Local Ration Boards in primary producers' envelopes (RB-61). Reports for November should reach the Local Ration Boards not later than December 10.

Following are the valid coupon codes for November:

	MEAT	BUTTER	SUGAR	PRESERVES
November 1.....	M 9	128	..	..
" 8.....	M 10	..	..	..
" 15.....	M 11	129	66, 67	P 20, 21
" 22.....	M 12	130	..	..
" 29.....	M 13	131	..	..

Farmers are required to send in "M" coupons to the Local Ration Board for meat they consume, and meat they sell to farmer neighbours at the rate of 4 lbs. per coupon. Farmers who slaughter meat need not turn in at the end of the month more than half the valid meat coupons in the ration books of their household. Farmers who purchase meat from other farmers must surrender to the selling farmer one meat coupon for every 4 lbs. of meat purchased, even if this means surrendering coupons not yet valid.

## FARM SLAUGHTERERS

Farmers who slaughter for their own household consumption or for the consumption of their farmer neighbours, are not required to hold a slaughter permit. Any excess of farm slaughtered meat over the farmer's or his neighbour's needs may be sold only to the holder of a regular slaughter permit in quantities not less than a quarter of a head or a side of Pork. Sheep, lamb or calves slaughtered by the farmer for his own or his neighbour's use may not be sold into the meat trade.

Licensed slaughterers' quotas for cattle have been temporarily suspended and until further notice a licensed slaughterer may slaughter all the cattle needed for his requirements.

**Rationing** is your assurance of a fair share. It is a protection against shortages...inflation. That is why farmers are asked to continue to collect and turn in coupons for their Local Ration Boards—once a month—in the RB-61 envelope.

For further information apply to the nearest office of the Wartime Prices and Trade Board.

## The Housing Problem

**HOUSING IS REGARDED** as Canada's greatest post-war problem. Congestion and lack of living accommodation is felt most severely in the large cities, but there is almost no community which has not been affected by the serious housing shortage which has developed here since 1939. It is estimated that by the end of the calendar year following V-E-Day, 50,000 new dwellings will have been completed, but it has been necessary to plan a considerably larger program to meet the need for houses in the following years. In addition to the need for new homes, there is much repair work to be done on dwellings and buildings, since labour and material for normal maintenance has been unavailable during the war. Hon. J. L. Riley, Minister of Finance, recently told Parliament that Canada is on the verge of a very large, and possibly an unprecedented large housing program, and such a program will no doubt affect many of our post-war problems, through the demand it will create for labour, raw materials and other essential supplies.

### Vast Program In Britain

While the housing problem here is extremely serious, Great Britain's situation is considerably more grave. That country was already facing a shortage of living accommodation in 1939, and during the war years this condition was greatly aggravated, since no new construction was possible, and in addition, many millions of homes were destroyed by enemy bombs. It is estimated that in the London area alone, almost two million homes were destroyed or damaged and that of these, forty-two thousand were totally demolished, and that in spite of an intensive drive to repair those homes which were only partially destroyed, it was reported that there are still seven hundred thousand damaged homes in the London area. Similar conditions exist in many other parts of Britain, and the government there has undertaken a vast building and town-planning enterprise as part of its reconstruction program.

### Provides Work For Veterans

In re-building its homes and communities, the British Government is endeavoring to improve living conditions for the people, and to create planned communities. In all parts of the country this "planned reconstruction" is taking place, and the British Ministry of Labour and National Service, Mr. Isaac, stated recently that by next June, approximately eleven hundred and twenty thousand men will be employed in the building and civil engineering industry. The houses and buildings to be constructed will be based on the latest scientific knowledge, since systematic building research has been carried on for some years, in anticipation of this time. This research has revealed many new facts concerning building materials, pre-fabricated homes, equipment, and other important factors. A program for training many thousands of ex-service men for construction work has also been commenced, and in addition to alleviating the housing shortage, Britain's plans for re-building are also aimed at providing long-term employment on a large scale. We in Canada may watch with interest, the progress of this vast undertaking.

## Price Control And Rationing Information

Q—My husband will be returning from overseas within the next week. Will I receive rations for him for the thirty days he will be home before he is discharged from the army.  
A—Servicemen on their pre-discharge leave will be presented with a combination priority suit purchase and ration book certificate, which means that those on discharge leave may apply immediately, either in person or by mail, to their nearest local ration board or ration branch, for a permanent ration book.

Q—My I purchase a local evening dress?  
A—Restrictions on the manufacture of wedding gowns, dinner and evening dresses and evening suits have been removed, and you may now buy a long gown if you wish.

Q—I am a farmer and slaughter for my own use only. Do I have to report this to the Wartime Price and Trade Board?  
A—Yes, you must register with your nearest local ration board, and send in coupons to the local ration board to cover the amount of meat you use at the rate of four pounds carcass weight per coupon.

Q—How can I obtain the price ceiling for a car I wish to sell?  
A—Get in touch with the nearest Wartime Prices and Trade Board office and they will give you the price ceiling.

Please send your questions or your requests for the pamphlets "Consumers' News" or the Blue Book in which you keep track of your selling prices, mentioning the name of the paper to the nearest Wartime Prices and Trade Board office in your province.

**RED CROSS SHIPMENTS**  
Twenty-nine countries received 57,082 Canadian Red Cross cases of supplies and relief goods in the first six months of 1945. About 230 ships had been used in transporting the goods, 12 less than for the whole of 1944.

## Indians In Canada

Census Taken Last Year Shows Population Not On Decline  
Contrary to popular belief, Canada's Indian population is not on the decline.  
Hon. J. A. Glen, Minister in charge of Indian Affairs, has announced that the Indian population is 126,000 and is increasing at the rate of 1,500 per year. Living in the prairie provinces are 42,532 Indians, and 12,441 in Alberta.

The minister said that according to a census taken in 1944, 15,033 Indians were residing in Manitoba; 14,108 in Saskatchewan, and 12,441 in Alberta.  
The distribution through the other provinces is—British Columbia, 25,000; Ontario, 22,421; Quebec, 15,194; New Brunswick, 2,074; Nova Scotia, 2,304; Prince Edward Island, 266; Yukon, 1,531; Northwest Territories, 3,818.

There are 7,658 Indians over the age of 65, while there are approximately 5,000 over 70.  
The Indians have 5,500,000 acres of land of their own, and a number of the reserves contain the best agricultural land in Canada, however there is a comparatively small acreage under cultivation. In 1944 land under cultivation amounted to only 188,929 acres.

In addition to the reserve lands owned outright by the Indians, Mr. Glen said the Indian department in 1945 years ago had purchased governments 35,000,000 acres for the establishment of beaver reserves and the propagation of muskrats.

**SMILE AWHILE**

"What's that piece of string tied round your finger for, Bill?"  
"That's a knot. Forget-me-not is a flower. With four you make bread, and with bread you have cheese. This is to remind me to buy some pickled onions."

Gerrie: Thanks for the seat, it was kind of you.  
Sally: "Not at all, I know some one who give their seats to pretty girls only, but looks make no difference to me."

Editor: Looks like we have another little suit on our hands.  
Layover: What is it this time?  
Editor: We printed in old Brown's almanac that he'd gone to a happier home, and Mrs. Brown is suing.

Johnny (at zoo): "Isn't that monkey just like Uncle James?"  
Mother: "Don't be so rude."  
Johnny: "But the monkey didn't hear."

"Do you know that your wife is going about telling everybody that you can't keep her in clothes?"  
"That's nothing. I bought her a home and I can't keep her in that either."

"I don't like the look of that halluit," said the lady customer.  
"Lady," asked the market man, "if these you're after, why not buy gold fish?"

Auntie: "How did Jimmy get in in history class?"  
Mother: "Not very well, but it wasn't his fault. They asked him things that happened before the poor boy was born."

"When I took Brown's lawn mower back, he swore at me over that missing screw."  
"We can't have that sort of thing, dear, you must borrow the vicar's next time."

Butcher: Here, madame, is a nice ham, home-cured.  
Mrs. Freshbirt: But I want one that has never been ill.

Young Man: How about some cold and polio pneumonia in the system. This headache, rheumatic pain, dislocated neck and that kind of feeling may soon follow. To help keep your kidneys healthy, get a bottle of Vicks Vapo-Rol today and use it as directed. Vicks Vapo-Rol is the best remedy for all these ailments.

NOTE: The answer of the puzzle is "I don't know." The puzzle was set by the editor of the "Gleichen Call" and is a very difficult one. The puzzle is a very difficult one. The puzzle is a very difficult one.

**When your BACK ACHE...**  
Backache is often caused by fatty kidney action. When kidneys get out of order excess acid and poison enters the system. ## EQUITABLE TREATMENT

The farmer patrons of Alberta Pool Elevators are treated with a degree of fairness and equity that is obtainable only under the co-operative system.

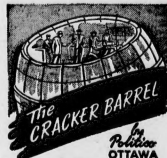

It happens some times that competitive grain handling organizations give preferred treatment to a very few farmers and at the expense of all the rest of the farmers as a group.

A little thought on what the Wheat Pools have done for the farming community should convince all farmers that it is to their advantage to patronize, wherever possible.

## Alberta Pool Elevator

Poor potato crops in Western Canada this season will not mean Alberta tables will go short, the WPPE says. To maintain normal supplies, potatoes will be imported from the United States and sold at Canadian ceiling prices. Lifting restrictions on imports will forestall any potato shortage arising from early September frosts in this province board officials point out.

States and sell at Canadian ceiling prices. Lifting restrictions on imports will forestall any potato shortage arising from early September frosts in this province board officials point out.

### BIGGER WINGS FOR TCA

It was in 1937 that a Liberal Government established Trans-Canada Airlines, a nationally owned flying system which has with only a \$5,000,000 capitalization served Canada bravely during eight difficult years and won the anxious applause of air-transport observers in other countries.

To expand TCA's facilities within Canada across the grey Atlantic to Britain over the glittering caribbean to Latin America, across the vast Pacific to Australia—the Liberals now propose increasing that capitalization to \$25,000,000. This program has been received with mixed reactions by opposition members in the Green Chamber. TCA's wings have pointed out the fact that the government would continue to press vigorously for more and better and cheaper routes.

to any other on the continent, and have acknowledged that Reconstruction Minister Howe, who has guided the parliamentary fortune of TCA during the past eight years, can take justifiable credit and pride for the excellent job done by TCA.

Canada is not the only country having difficulty building houses. The situation in Australia, the United States and Great Britain is parallel with tremendous pressure for new new dwellings, and with shortages in materials and man power all along the line.

Nevertheless, Canada actually has produced a surprisingly large number of housing units during 1943, 1944 and thus far in 1945.

Moreover there is every expectation that the Government's goal of 50,000 housing units between June 1945 and June 1946 will be attained. Of this latter number, Wartime Housing Limited has provided 7,300 low rental houses for discharged members of the Armed Forces while the Veterans' Land Administration has provided another 3,000 units. And these figures grow monthly.

Introducing a government resolution in the Commons to set up the Central Mortgage and Housing Corporation, with \$5,000,000 capitalization, Finance Minister Liley said that the government would continue to press vigorously for more and better and cheaper routes.

The new corporation will be empowered to buy mortgages from the lending companies and to resell them to lend to loan and trust companies, and to buy trust company debentures.

The result will be an adequate flow of mortgage loans in all parts of Canada, with a steady movement in the direction of lower mortgage rates and more suitable terms for both rural and urban areas.

### CEILING FOR HOUSES

By thus widening the bottleneck of financing, the government housing program reduces this handicap. The situation is improving in other ways. There is continued flow of labor into the construction trade and a steady if slow coming in the materials supply.

However the pressure from these two latter conditions has been forcing up the prices of new homes. Finance Minister Liley admitted that this problem had been giving the government much anxiety.

Members of the House of Commons accordingly came to the alert when Mr. Liley said that, despite administrative difficulties, it may be necessary for the government to institute some form of control over the prices of new houses. Purchasers of these may be given some of the protection extended to tenants under rental control regulations.

## Curling Club Meets

Annual meeting of the local Curling Club was held in the town office Nov. 6th with a good number of members present.

State of officers for the coming year are president, W. Blaney; vice-president, D. McDonald; treasurer, T. C. Brown; all elected by acclamation. Newly elected secretary, F. Froggatt, former club secretary having moved away.

The treasurer's report read by T. C. Brown showed the club had a favorable season last winter and is in good financial condition.

Indications are that the membership will be increased this year to 75 or more. The club is endeavoring to obtain more rocks for use this winter.

The executive and ice committee elected by acclamation for another year are making preparation to have ice ready as soon as possible.

### CARD OF THANKS

In this way we would like to thank each one who has been so kind and generous on our return to Gleichen Ollie Woods and Family.

### CARD OF THANKS

Mrs. C. Evans and family wish to thank their friends for the many kind expressions of sympathy in their recent bereavement.

There will be no service in St. Andrew's Church on Sunday November 11th, as there is to be a Remembrance Day service instead in the Community Hall at 10:15 a.m. sharp.

Next Sunday night at 12 o'clock the annual 11th of November Legion Frolic and dance will take place in the Community Hall. This will be the second midnight doings to take place this year. The last time being New Year's eve.

Snow started falling Sunday and all day Monday a snow storm swept the district to make snow drifts two feet deep in places, Tuesday morning the mercury registered five below zero.

Single license plates will be displayed on Alberta motor cars in the new period opening next April 1, according to information received from the provincial secretary's department. The single plate was restored during the past year, after the picket system was tried out for a year as a war measure. Officials say that the new 1946-47 plates have been ordered and they will be available to applicants under rental control regulations.

Any machinery for handling such a problem would be complex and hard to manage, but there is no doubt the result: would be of great benefit to Canada and every prospective home builder await the government's final decision with keen interest.

starts in good time before April 1. When the old two plate system will be restored is a question, though there are some suggestions that it will come into effect in the 1947-48 period as more steel will be available then for civilian needs.

## 1885 SIXTY YEARS OF PROGRESS 1945

## A Dream Come True

When, on November 7, 1885, the last spike was driven linking the rails of the Canadian Pacific Railway, developments only dreamed of that day were to follow.

Soon ships flying the red and white Canadian Pacific house flag were plying the Pacific... then the Atlantic. There followed a chain of hotels... resorts and lodges... coastal and inland steamships... express and telegraph services—the whole forming an all-Canadian system stretching more than half way round the world.

In 1939, this vast system was dedicated to the winning of the war. Since then the Company's rail lines alone have handled more than 128 billion ton miles of freight—and 11 billion passenger miles. All ocean steamships have been on active service—many have gone down fighting.

Now the Canadian Pacific faces the future. Plans have been completed for the construction of new, improved locomotives and coaches... sleeping cars... parlor cars... diners; for the renovation of stations and hotels; and for the building of a new fleet of ocean vessels.

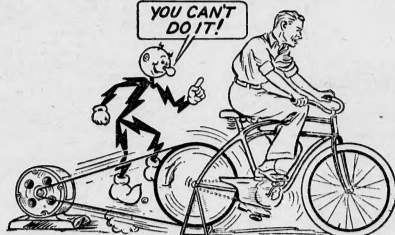

In a world at peace the Canadian Pacific will do its part in providing modern, efficient transportation by land and sea.

## DO YOU KNOW HOW MUCH A KILOWATT HOUR IS?

YOU CAN'T DO IT!

It is said in order to learn the value of anything, try to make one yourself. In the case of a kilowatt hour of electricity, you'll find it quite a task to make even one.

Several years ago a stationary bicycle was built to drive an electric generator. At numerous Electrical Shows many tried their hand, or rather legs, at generating electricity. At one show, 213 people pedaled the machine until they were tired, and their combined work produced only 2½ kilowatt hours of electricity!

At Madison Square Garden a champion six-day bicycle rider pedaled this same machine in a desperate sprint of one minute. The meter showed that he made about five-hundredth of a kilowatt hour. If he and his team mate had kept up this sprint for six days and nights (impossible of course) they together would have made about 47c worth of electricity—poor pay for a week's work for two famous athletes.
